Core Technologies & Skills

MYSQL (22)	PHP (21)	JQUERY (16)	REACT (10)	POSTGRESQL (8)	LARAVEL (7)
DOCKER (6)	NODEJS (6)	RUBY (6)	RAILS (6)	JAVASCRIPT (6)	FUELPHP (6)

Lasting Dynamics

Sr, Backend Developer

2023 – 2025

Remote

Backend development across diverse enterprise projects from system design to deployment. Worked on multi-project development with varying team sizes and technology stacks using TypeScript, NestJS, Python, and modern cloud infrastructure.

FastVan

Full-Stack Tech Lead

2022 – 2023

Remote

TYPESCRIPT NODEJS REACT REACT-NATIVE HAPI DOCKER REDIS MONGODB
WEBSOCKETS

Functioned as CTO for logistics platform, leading technical direction and team coordination. Architected and executed major migrations: class="highlight-keyword">React class components to hooks, class="highlight-keyword">Node.js v12 → v18 upgrade, complete JavaScript to class="highlight-keyword">TypeScript conversion. Led microservices extraction, real-time tracking system development, and established modern development workflows.

ThatThrowdown

Full-Stack Tech Lead

2022 – 2022

Remote

PHP LARAVEL NODEJS NEXTJS REACT POSTGRESQL DGRAPH

Contributed to major refactoring of music platform from monolithic architecture to modular design. Participated in technology stack modernization and database migration, ensuring data integrity and optimal performance.

Tempin.io

Ruby on Rails / Vue Web Developer

2021 – 2022

Remote (Canada)

RUBY RAILS VUE QUASAR GRAPHQL POSTGRESQL RSPEC JEST

Contributed to platform for scaling on-site working teams with unpredictable staffing demands. Implemented GraphQL API features with Ruby-GQL and worked on Quasar/Vue components. Participated in designing state machines for time tracking, assignment progression, user/company statuses, and multi-tenancy. Worked on achieving full test coverage with RSpec and Jest, and helped build complete CI/CD pipeline.

Zidweb

Full-Stack Developer

2021 – 2021

Remote

VUE NUXT NODEJS LARAVEL PHP

Contributed to confidential client project with `Nuxt.js`/`Vue.js` frontend and `Node.js`/`Laravel` backend. Delivered solutions within tight timeframes while adapting to evolving client requirements.

Alpine Intuition

Full-Stack Javascript Web Developer

2020 – 2021

Remote (Switzerland)

Participated in development of two distinct projects: iSquared AI metrics platform (`Node.js`/`React` full-stack) and confidential Python parsers for AI model architecture. Contributed to system design from scratch, implemented CI/CD pipelines, and delivered production-ready solutions.

People Per Hour

Freelance Web Developer

2019 – 2020

Remote

Full-time freelancing across diverse tech stacks and multiple client projects. Delivered microservices architectures, frontend migrations, podcast platforms, games, and data processing solutions using PHP, Ruby, JavaScript, and Python ecosystems.

Partnership with Ilyes

Laravel/React Full-Stack Developer (Partnership with Ilyes)

2017 – 2019

Remote (Geneva/France)

Partnership focusing on full-stack development of educational and management platforms in Europe. Delivered multiple projects using Laravel, React, and modern deployment practices.

WebinDZ

Co-founder and Lead Developer

2014 – 2017

Ain Oulmene, Sétif

Co-founded web development agency. Started with Rails projects, transitioned to custom PHP framework built for cost efficiency. Developed 10+ client websites including e-commerce platforms and custom applications. Handled architecture decisions, team leadership, infrastructure, and deployment automation.

Odesk

Freelance Web Developer

2013 – 2014

Remote

Freelanced across multiple platforms (Odesk, PPH, private clients) delivering diverse solutions: desktop applications, WordPress sites, OpenCart e-commerce, Rails applications, and contact management systems.

Clickpctech

Junior Web Developer

2011 – 2013

Ain Oulmene, Sétif

PHP JQUERY MYSQL WORDPRESS OPENCART APACHE BASH LINUX FTP
WHM CPANEL PHPUNIT JAVASCRIPT HTML CSS CSHARP DOTNET
SQLSERVER

Advanced from intern to junior developer. Built custom e-commerce solutions with `OpenCart`, creating custom fork with robust ORM layer and enhanced module handling. Developed platforms for Messahel and Azess with multi-language support, custom payment gateways, and advanced product management. Created internal C# inventory management system with SQL Server. Implemented MVC architecture, automated testing with PHPUnit. Managed server deployments with Apache, bash scripts, FTP via WHM/cPanel. Worked on `WordPress`, Magento, and Joomla sites.

Clickpctech

Intern

2010 – 2011

Ain Oulmene, Sétif

PHP APACHE MYSQL JAVASCRIPT JQUERY HTML CSS

Gained foundational web development experience with `PHP`, Apache, and SQL. Worked on debugging and optimizing `PHP` code, configuring Apache servers, and managing SQL databases. Acquired fundamental front-end skills with `JavaScript` (ES3/ES5), jQuery, HTML3/4/XHTML, and CSS2. Learned server-side scripting and web infrastructure essentials.
